Question: Site 3 has initiated Transaction T to transfer tk 1000 from account P at site 4 to account Q at site 2. Write down the tasks of TC3.

Answer:

Task list of transaction coordinator 3 from above scenario.

1. Initialize the execution of transactions at site 3.
2. Distributing sub-transaction to site 4 and site 2, through coordinator managers of appropriate site.
3. If two ~~transactions~~ sub transactions successfully updated P account (1000 tk deduction) and Q account (1000 tk added) then it will be committed to all sites. Otherwise it will rollback on aborted at all sites.
